

Double Eagle News

Kids' Corner

This week we asked our kids, "What are your favorite things about spring?"
 Stella said, "I love all the bunnys."
 Sam said, "I can finally wear shorts."
 Ashby said, "Balloons full of water and swimming in the pool. My mom says no but it's not too cold!"
 Stella A said, "More animals come out."

STEAM at the our Site

Science, technology, engineering, art and math are skills that are in high demand in job markets. Our goal is to get our kids exploring and learning each one of these skills. Research has shown that when kids are having fun they are learning the most. Here are some of the activities we have been doing that empowered STEAM skills. In our science enrichment class we learned about how polymere chains work together to keep water from spilling. The secret of this trick is in the bag. Most plastic ziplock bags are made from a low-density polyethylene, which creates a flexible yet durable barrier and an awesome party trick!

Drew and Nickolas with their experiment.

Skyler and Alex tossing their surviving egg.

We love the chance to get our hands dirty. Another great experiment was our egg drop contest. We worked together, in teams, to create the best protective shield that would allow our eggs to withstand a ten foot fall. Our engineers had to use a lot of creativity because they had limited materials. Together we learned a lot and had many successes. As a reward for our all our hard work, we had an egg toss with the survivors.

Children's Choice

Volume 12, Issue 9
 April 2018

Reminders:

- Field trip to the zoo April 5th
- CQI meeting April 12th
- Make sure to register for summer camp at Double Eagle!
