

John Baker News

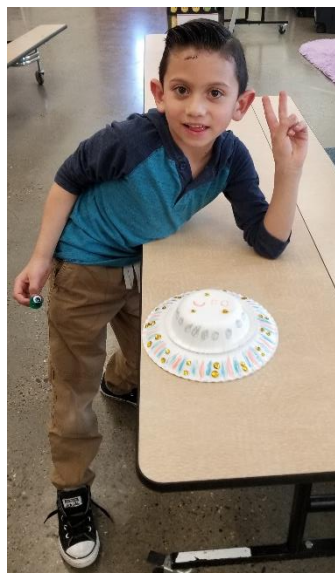

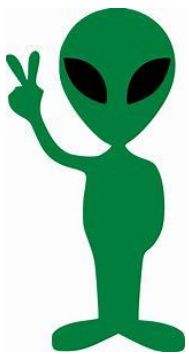

March 2020

Art and Science were prominent in our activities and field trips last month. Check out some of the fun we had and read up on what's coming this month.

The John Baker Staff

Aliens Among Us?

David came in one day with the idea of making flying saucers. His request was simple: a bowl, a plate, and some art supplies. Pretty soon he had a whole group of kids designing their own spacecrafts.

News and Notes

3/8 - Daylight Saving Time Begins

Don't forget to lose that hour. Ugh! Monday morning is going to be rough.

3/12 & 3/13 - Parent-Teacher Conferences

School is closed so we will be open at Sombra as usual. Please remember to register online and send a lunch with your child.

3/11 - Natural History Museum Field Trip

This one ranked high on the kids' list for our Guide to Albuquerque Project. Should be a lot of fun.

3/26 - Dr. Seuss Day

Our theme for the day is 'Oh The Places We'll Go!'. Stop in for a visit to see all the amazing places our staff and kids have created.

3/30 - 4/3 - Spring Break

Again, school is closed so we will be open at Sombra. Please remember to register online and send a lunch with your child.

Art Attack!

We got to paint and create for the afternoon thanks to Art Attack. The older kids helped set up and make sure everyone had what they needed to finish their creation.

Science Is Real

Over the last couple of months, we've run over a dozen experiments. We've found that only about half of them have worked the way they do in the book and spent some time talking about what did or didn't work and why. Working with bubbles is always fun since you can just play with them even if the experiment fails.

I liked playing on the swings because I got to go really high and it made me feel super excited! - Eric

Monday at the Park With CC

On Presidents' Day, we took a walking field trip to Aztec park near Sombra. Here's what the kids had to say about the day:

The worst part was that it was super hot, but the best part was that there was a lot of equipment to play on. - Lorelai

A good part of this field trip was that we had a lot of space to run around. I really enjoyed playing 'groundies'. That was a lot of fun. - Sydney

I thought about whether I could do the monkey bars or not because they were a funky shape. - Emilie
