

Monday 4/19	Tuesday 4/20	Wednesday 4/21	Thursday 4/22	Friday 4/23
<p>Rainbow Research Explore color and light with color films and projectors to make a magical environment in our pull out classroom.</p>  <p>Making Monuments Take a trip around the world and recreate civilizations greatest monuments out of foam and wood blocks</p>	<p>Creating Kawaii Learn to draw kawaii characters with happy drawings on you tube.</p>  <p>Marshmallow Geometry Learn concepts and build geometric structures with marshmallows and tooth picks</p>	<p>Chess Champions! Our community is invested in learning and playing chess! We will hold a 10 board event where players can practice and compete while watching the Queen of Katwe, the amazing story of chess master Phiona Mutesi.</p> 	<p>Super Slime Time Learn the art of our favorite ooey gooeey past time!</p>  <p>Cup Stacking Cup stacking, taking it to the max! Kids will learn techniques on tiny, regular and giant cups and compete with others with speed and precision.</p>	<p>Foot Drawing Drawing? With your feet? Yes! We will flex new muscles with this activity where students can only use their feet and toes to create landscapes.</p>   <p>Don't Break the Ice Using DIY ice rinks made of tissues, we will see how many tooth pick pokes it will take for our animals to fall though the ice!</p>

**THIS WEEK'S ACTIVITIES WERE DESIGNED BY
THE DRAGON AND KAI**

QUESTIONS FOR MACK

What is your strongest memory from this year? I got an expander! Mrs Kelly (the school nurse) gave me some painkillers so it's not so bad. The orthodontist put these rings in my mouth and I had to bite down on a stick and then they just shoved it in and now my mouth can get better.

What is a question you have about the universe? I wonder if there is other life out there. I think there is we just haven't found it yet. I don't think they are good or bad I just think they are different then us.

What is the best gift you have ever received? I think that would be my stuffed animal named Bino. I got it at my baby shower, I didn't even know I was getting it because I wasn't born yet.

What is something you are really good at? I'm good at making stuff, like in the art area. I make gifts for my friends and family. Today I am making stuff for a magic show.

What will the world be like when you are an adult? There will be cool new inventions like flying cars and people will be healthier because there will be more doctors and there will be machines that help sick people.

If you could be granted one wish what would it be? To be able to make robots. I love robots. I would want them to fight each other for prizes. It would be like Pokémon battles but its real!!!!

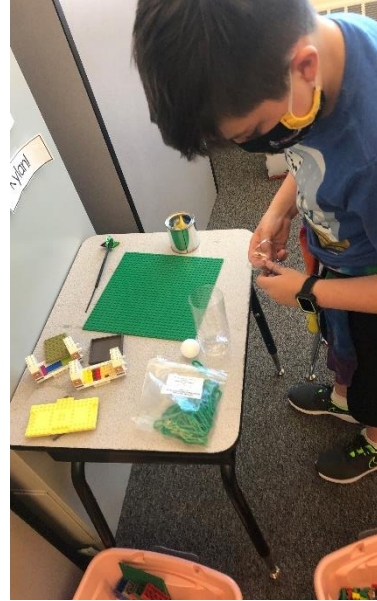

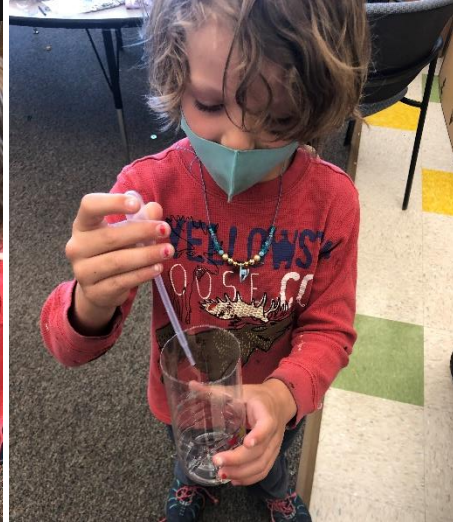

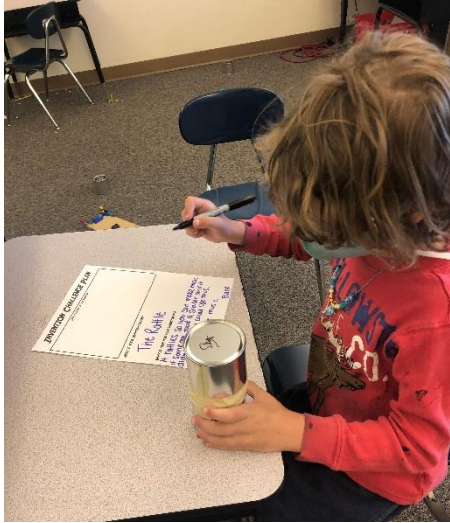

If your child is going to be absent from CC please call or text us at (505)504-4557 or email us at northstar@children-choice.org

MACK

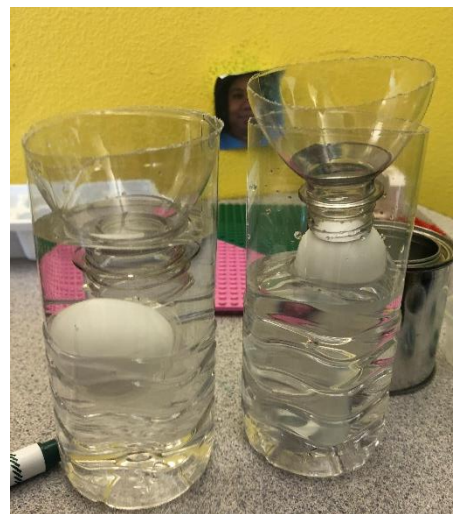

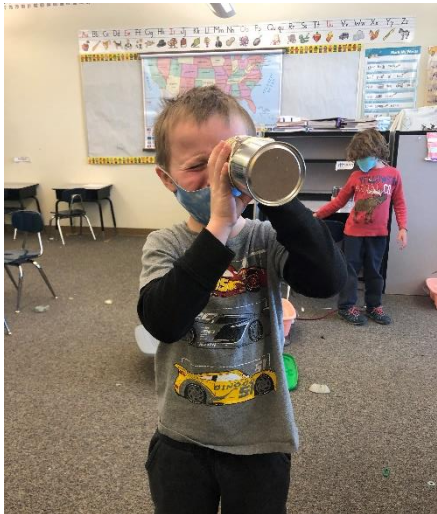

MEET OUR CC INVENTORS!

Given just Legos and leftovers from science kits donated from the school this group of inventors created new ideas and products, take a look...

BLAKE I made this to make music, it's kind of like a maraca. I love music so I wanted to shake it, I put those metal things (metal washers) in the metal cup and it makes a good noise. I also made this thing that can bring like drinks and stuff from one place to another. My mom is a scientist so I'll probably give this to her.

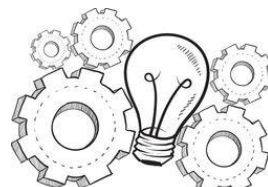

NATHANIEL- The water preserver comes with a full water bottle and an empty one and a little thing of soap. You can put the soap on your hands and use the full water bottle to rinse off your hands into the empty one so you can wash your hands anywhere!

TOBY - Ok I made like a lot of inventions. This one is a telescope and you can see through it and it makes thing really blurry and pretty, I am not a pirate though. My other one was kind of like an experiment. I wanted to see if the metal would make the ball in the cup stay down but it didn't work... but wait the metal made the cup stay down so maybe it kind of worked, it's called the ball floater.

JOSEPH- This is like a bus or like a sub train... A subway. You can see the part where the driver sits and I am going to attach a windmill thing to the back so it can go really fast and really far.

SAMARA-This is a boat car. You can drive on land and in the water, it would be good if you lived in California like I used to. The wheels flip up on the car and attach to the sides when it transforms. There is also a lever to switch the engine. There are life jackets for when you're in water and seat belts for when it is a car and you are driving around. **Samaras car boat was voted best invention by the group!**
