FULL DAY HURRAY!

We love full days at the site because we get to spend the days doing lots of fun and activities! This break we are thinking about what it means to be thankful and how we can give back to others in our community. We will be raking leaves for our school, finger knitting presents for the holidays, playing turkey trotting games and learning about the outdoor wildlife that surrounds our school. Please make sure to pack lunch!

OLDER KID'S- YOUNGER KID'S CLUB DAY

Our first day of older kid led activities was a success! We had several activities running throughout the day, just like old times, there was one in almost every interest area. The kids seemed to really enjoy the activities run by other kids, and they even brought their own interests to the younger kids to run their activities.

Ellison, Rachel and Ethan ran a Read Aloud activity where they read books to the kids. Rachel said, "I did like reading to the little kids, the problem was some of the kids didn't listen, but it was fun!"

Amelia and Kendyl ran a Science club making homemade play dough. Kendyl said, "Our activity turned out great! Our mixture came out feeling like play dough, and the kids liked it. Jackson really liked the feeling of it. Veronica and Audrey really enjoyed the play dough and loved coloring it. And Adriana liked how it felt like real dough."

OLDER KID'S YOUNGER CLUB

(Continued)

Aaron had an art competition with random things they found in the Art Area. Aaron said the one struggle in running his activity was finding kids to join, but those who did join really liked the idea and had lots of fun participating. What he liked the most about his activity was that they were all nice to each other.

Juanita, our staff said "I noticed and heard that our kids were really enjoying our full day of kid lead activities, which makes me very happy because it reminds me of pre-pandemic times. "

Lilly was interested in running her own activities with the community, just like the older kids did. We found her in art area creating posters for her DIY Club that she is starting next week.
