ROCKETS IN ACTION!

Did you know that the Earth is made up of 35% iron? The kids at Children's Choice sure do!

This week we spent a lot of time outdoors, hunting for iron! We did this through the use of magnets. We took the magnets outside, dug shallowly into the ground, and used them to attract iron straight out of the dirt and sand. Kids collected fragments of iron and put them into bags so they could then take them home.

The children first collected the iron in paper cups, then transferred it all to Ziploc bags to take home.
Left: Noah and Shealyn

Below: Orion, Liam, and Bradley

We had lots of different kinds of magnets that the kids could use - large ones shaped like horseshoes and smaller ones with handles.

KID SPOTLIGHT!

Interview with Azalea (age 7)!

1. How is life? How are you enjoying school? Good! I like that I play with my friends and that my teacher is Mrs. Brugge. I have a nice principal. I have 2 sisters and 2 brothers, a mom, a dad, and a great grandma! I have long brown hair! And Harmony is one of my best friends! I also love to come to Children's Choice.

2. Do you have any pets? Yes, I have 2 cats. I used to have a dog but he jumped out of the window while we were driving and my other dog Roxy ran away. My 2 cats names are Malo and Coco. They are brown and white.

3. What's your favorite food? Cereal and macaroni and bananas and apples and grapes and peanut butter and jelly sandwiches! I also love juice!

4. What do you want to learn this year? I want to learn about skeletons and what's inside our bodies! I love science. I would also love to learn about my friends and what they like. I also would like to know how construction workers do their job.

5. If you were a superhero, what would your power be? To be able to run faster and be able to catch things. I also would like to have super strength and pick up all the slides!
