Featured CC Kid of the Week!

This week we interviewed Nina a 9-year-old here at Osuna.

How's third grade going? Pretty good! It's fun, it's my favorite grade so far.

Are you excited to be in fourth grade? Yes, I'm very excited. **What are you most excited about?** Learning about stuff, mostly planets. I love planets. **What do you want to learn about them?** Umm... how to be an astronaut because that's what I want to be when I grow up.

If you were an astronaut and you got to the moon what would you do? I would step all over the moon and I would make my own flag to put on the moon. **What would it look like?** A cat! The first cat on the moon!

What's your favorite part of coming to CC?

Playing with friends and playing with all the equipment here mostly. **Do you have a favorite area or favorite activity?** All of them!!

Do you have any hobbies?

Art, and watching YouTube. Watching YouTube is a hobby to me, and I don't know what else. **Do you have a favorite YouTube channel?** Yes, I have two that I mostly watch, Aphmau and It's Funny. They scream a lot, like a lot! And my mom feels so much better about me watching it because we got a new TV and now, I can connect Bluetooth headphones, so she doesn't have to hear it anymore. Cause she could hear it like a mile away!

If you could have superpowers, what would you want to have and why?

Talking to animals! I would talk to all my cats. I would tell them that they're so cute because they are. They're also hungry all the time! They're always meowing that they want more food. **What do you think they'd tell you if you could understand them?** I don't know, maybe that I need to feed them more!

Orange Peel Bird Feeders with Marisa

Last week Marisa made orange peel bird feeders with the kids. Catalina (5) explains, “We got popcorn, oranges, peanut butter, bird seed, plates and spoons because that was all we would need to make for the activity.” She said, “I was happy to get to eat the inside of the orange and the popcorn after the activity. And I was happy because mine looked exactly like the picture of what we were making.” When asked what she should change about the activity for next time she said “Try making bird feeders again but with some different materials.”

Mother's Day Gifts with Alicia

What did you make?

Rowan- I made this ocean box that has hearts in it and it's going to have a solid platform for my earrings.

Aubrey- I made a little box and then I'm going to turn these shells into earrings. So, it's an ocean box with seashell earrings.

Julianna- So it's like a little box and it has a seashell on it and if you look under it, it looks like the ocean.

What was the best part of this activity?

Rowan- Getting to use the hot glue which was also the hardest part. I did little dots of hot glue to glue the sequins so I indeed a rock to touch it and not my fingers.

Aubrey- Probably making the ocean box. It was hard to glue the shells on and in the box. I decided to just glue the outside rim and put the shell on the side to make it easier.

Julianna- That we got to hot glue and make things. Not getting burnt with the hot glue was hard but I made sure my hands weren't close to the hot glue gun too.
