Osuna Times

Culture Club: Piñata Making

What did you learn from this activity?

Juliette- That the cups are made of clay and they come from Mexico.

Rowan- I learned that all the fun piñatas are made out of different materials and the original Mexican piñatas are made out of clay pots.

Noa- How to make a piñata.

Aubrey L- I learned that Mexican piñatas are not all fun cartoons or characters, there are the spikes Star piñatas.

What would you do differently next time?

Juliette- I would make a heart and the heart would be pink red and turquoise.

Noa-More candy!

Rowan- Put spikes on it because I didn't do that this time.

Aubrey- I would try and put the spikes on.

Campus Trash Clean Up

Desiree thought it wasn't enough to just clean the playground, so we went out onto the courtyard and the grassy field to fill up our trash bags.

Catalina- "I'm going to pick up the most trash."

Connor- "Do we get a prize for helping?"

Adrianna- "We should've done a competition to see who picked up the most trash."

Desiree- "I like picking up trash to help the environment."

Archaeology Club

I noticed Elliot was digging up rocks outside and I started digging with him and we thought it would be cool to have an Archeology Club.

We started by using pre-made dinosaur eggs and the kids were very interested and wanted do to this activity again

This can be a door to many activities! We can make our own eggs using things we find outside, and I know parents who are archeologists that I can reach out to and maybe arrange a presentation. We could even do a field trip to the Dinosaur Museum! :D

Elliot: I want more dinosaurs!!! 🦖

Kaidence: I'm gonna use the dirt the dinosaur was in to make my dinosaur a little throne!

Harmony: I'm getting the dirt we used and making dinosaur statues.

Nina: I found an underwater dinosaur in mine! *grabs a cup and puts water* okay now it can live in its habitat happily 🐉

Braeden: I think I got a spinosaurus

Activities

Marissa

“It’s time to bring our community together again and the kids are super excited to start planning for our next family night. Hopefully we can figure out a really cool theme for everyone to enjoy.”

Alicia

“Culture Club is looking to bring in a guest speaker and we are currently rescheduling our field trip to El Mezquite on San Pedro.”

Kade

“We are moving on from finger knitting and have now begun crocheting. We also still have kids interested in crystal making and I can wait to be apart of the 3 squiggle drawing competition.

Zeke

“Leprechaun Limbo, 4 Corners Competition, and Green Eggs and Ham is just what this spring needs. I hope the kids enjoy these green activities.”

Destiny

“Hair Tinsel was super fun and so many kids wanted to join I can’t wait to do this activity again. The kids have been asking to play four square and to paint again. I can’t wait to teach and learn all the old and new rules of four square.

Ariel

“We are going to be taking it back in time with games of hopscotch, hula hoop competitions, and the infamous rubber band launchers.”

Jonathan

“The kids have become super interested in tennis but haven’t quite mastered the art of not losing every ball we have. We will be starting a Tennis Club where hopefully we can plan a walking field trip to the neighborhood tennis court down the street.”

Owen

“Assemblage Sculptures, Piano Club, and Games Circle are some of my next activities. I’m hoping to get the kids engaged in their environment, music, and creative skills.
