Canvas Creations with Janessa

For this activity, we painted our own magnet canvases using different colors and paintbrushes. We all had our own creative ideas and enjoyed choosing colors and adding details to our designs. As we painted, some of us changed our ideas and added new details. One of us decided to focus on natural images and soon enough more of us followed suit. We were excited about our finished artwork and talked about taking it home to share with our families. Overall, we had fun being creative and were proud of what we made!

"I'm going to hang mine on my refrigerator at home." –Addy, 5

"I can't wait to show my mom!" –Maddie, 6

The Experiment Studio: Light Lab with ERICA

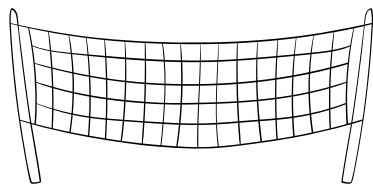

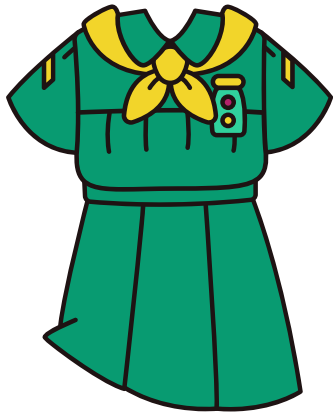

For our first day of Light Lab, the children became UV Detectives as we explored a type of light that we cannot see with our eyes. We started off by sharing what we already knew about the sun before introducing the UV-sensitive beads and began brainstorming how we could use them to detect ultraviolet light. After making our predictions, we headed outside and quickly discovered that when the beads were exposed to sunlight, they changed from a clear color to bright shades of pink, purple, blue, and yellow. From there, we experimented with different ways of blocking UV light, including shade, sunscreen, and sunglasses. Every experiment produced different results, and each child brought their own ideas and observations to each test. To finish, we used UV beads and other decorative beads to customize our own UV detector, which they could continue experimenting with outside! Overall, we enjoyed discovering the invisible light around us and turning our curiosity into colorful experiments and creations!

"I can't believe they changed colors and then back to white when we came inside!" –Oscar, 5

"I want to make another one! I'm going to make a bracelet for my mom, and my friends, and for everybody." –Amyra, 7

Meet Colbie and Blake

Colbie and Blake are siblings separated by 2 years, but have a special similarity: according to Colbie they are “holiday babies”. Colbie’s birthday is right next to Valentine’s Day and Blake considers himself “so lucky because he is a St. Patrick’s Day baby”.

They spend quite a bit of time together outside of school and extracurricular activities. They both enjoy making art projects and they often watch tv together. Blake claims to have imposed one of their favorite TV shows onto Colbie: Chip ‘n Dale. They also share a passion for Asian food; Colbie enjoys squid tentacles while Blake enjoys Korean ramen - specifically inspired by the Korean boy band, BTS. Colbie says one of the biggest differences between her brother and herself is that she enjoys school more than Blake. Blake thinks a “big big big difference is that sometimes I’m just taking naps when Colbie’s up”. It’s clear that Colbie is quite a bit more active than Blake in that she’s involved in volleyball and girl scouts. Although Blake prefers to spend his time playing videogames on his Switch 2 console, he did attempt to join a boy scout troop but he says “they shattered my eardrums”.

Blake has one thing to ask his parents via his interview: “Please buy me a videogame”, specifically “Meccha Chameleon”.

Lastly, Blake and Colbie have some advice for our ADO kindergarteners:

Colbie says “Be kind to others and try your best”.

Blake says “If a kindergartener doesn’t wanna do something, encourage them to think it’s a game. Kinda like ClassDojo points, you wanna earn a lot of ClassDojo points and if you don’t listen and follow directions then you won’t get a lot of points.”
