FALL NAIL CREATIONS

You've heard of normal nail polish from a standard nail polish bottle, but have you ever heard of nail polish pens? With Kelsey's Nail Art Club, the kids have discovered new tools to use to glamify their nails! This Halloween season, Eliana is working on a stitched French tip set!

For this activity, Apple Architects, Layla wanted to give the kids a fun way to explore STEM while using their creativity and problem-solving skills. She gathered apple slices and toothpicks and challenged the kids to build their own structures using only those materials. She was excited to see what they would come up with, and the activity went really well! The kids enjoyed experimenting with different designs and figuring out how to make their structures stand. Some built tall towers, while others created smaller designs. It was fun seeing everyone show off their creations and try new ideas. The kids would love to try this activity again using marshmallows instead of apples to see what different structures they could create. Overall, the activity was a success, and the kids had a great time! 🍎✨
