Important Information:

Site Phone Number: 505-480-1298 Site Director: Lena Mendoza

Absences:

Your child's safety is our top priority! If your child will be absent from Children's Choice on a day they are scheduled, please call / text our site phone at (505) 480-1298 to let us know.

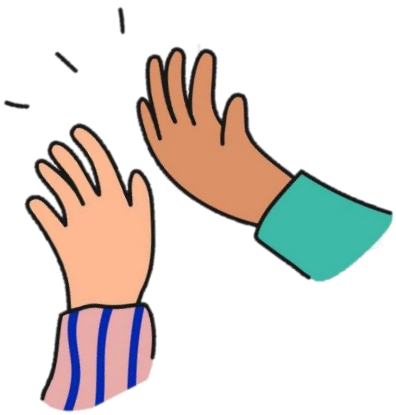

Ready, Set, Pumpkin!

In this activity, the kids brought plenty of energy and enthusiasm to a festive pumpkin relay race! Working together in teams, they raced to carry and pass pumpkins to their teammates, putting their coordination, balance, and gross motor skills to the test. Along the way, the kids practiced teamwork, encouraged one another, and celebrated each other's efforts. Raegan cheered on a teammate, saying, "Good job, Thea! You can do this!" The activity was a great opportunity to build confidence, practice sportsmanship, and enjoy some friendly fall competition!

Fungi Fun!

In this activity, the kids gathered for an exciting game of Mushroom Mayhem, where they stepped into the roles of ants or cordyceps mushrooms! Using a taped grid to navigate the playing area and bowls of confetti to represent mushroom spores, the kids brought this interactive learning activity to life. As they played, they explored how cordyceps fungi spread their spores and interact with insects in nature. The game was filled with giggles, curiosity, and plenty of friendly competition as the kids learned through hands-on play. It was a fun and engaging way to combine science, movement, and teamwork!

Now You See It!

The kids fused art and science in an exciting experiment called Peek-a-boo Art! To get started, they created two liquid mixtures: warm water and baking soda for their “white” mixture, and hand sanitizer and turmeric for their “orange” mixture. Using their fingers, the kids painted invisible designs onto their paper with the white mixture. Once the designs had completely dried, they painted over them with the orange mixture and watched as their hidden artwork magically appeared! The kids loved seeing the science behind their creativity come to life through this colorful chemical reaction.
